DETAILED ACTION

Drawings

The drawings have been approved by the examiner.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was done following a telephone interview with Jeffrey G. Toler (Registration Number 38,342) on 07 November 2006.

After the examiner's amendment, amended claims will read as follows.

1. A method comprising:

receiving a request from a parent or guardian of a minor to sign up for an Instant Messaging (IM) service on behalf of the minor at a server;

providing a Web-based profile administrator interface to the parent or guardian;

receiving a profile, created by the parent or guardian using the Web-based profile administrator interface, that comprises one or more control policies for usage of the IM service by the minor at the server;

receiving a request from the minor to log on to the IM service using a client device; and

communicating information from the profile associated with the minor to the client device to modify the functionality of the client device by installing a plug-in to comply with at least one policy in the profile.

3. The method of claim 2 wherein the policy engine comprises [a] the plug-in for an instant messaging client.

5. The method of claim 4 wherein the policy engine comprises [a] the plug-in for an instant messaging client.

7. The method of claim 6 wherein the policy engine comprises [a] the plug-in for an instant messaging client.

11. A system comprising:

a first server to receive a request from a parent or guardian of a minor to sign up for an Instant Messaging (IM) service on behalf of the minor, to provide a Web-based profile administrator interface to the parent or guardian, and to receive a profile, created by the parent or guardian using the Web-based profile administrator interface, that comprises one or more control policies for usage of the IM service by the minor; and

a second server to receive a request from the minor to log on to the IM service using a client device, and to communicate information from the profile associated with the minor to the client device to modify functionality of the client device by installing a plug-in to comply with at least one policy in the profile.

13. The system of claim 12 wherein the policy engine comprises [a] the plug-in for an instant messaging client.

15. The system of claim 14 wherein the policy engine comprises [a] the plug-in for an instant messaging client.

17. The system of claim 16 wherein the policy engine comprises [a] the plug-in for an instant messaging client.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicant's invention is system, method for a parent or guardian of a minor to sign up for an Instant Messaging (IM) service on behalf of the minor at a IM providing system with one or more servers. This is to prevent the situation wherein when the minor takes his/her IM device to another location having another base station and

Art Unit: 3629

another host PC, usage of the IM device is dictated by a different set of IM preferences which may be less restrictive than the preferences stated in the host PC at home.

In the claimed invention, when a server in the IM system receives a request from the parent or guardian, the server provides a profile administrator interface to the parent or guardian. By using the provided interface, parent or guardian create a profile with one or more control policies for usage of the IM service by the minor at the server which is received by the server. When the minor associated with the profile makes a request to log on to the IM service using a client device, the IM system communicates information from the profile associated with the minor to the client device to modify the functionality of the client device by installing a plug-in to comply with at least one policy in the profile.

This ensures that the client device used by the minor will be limited with the functionality and/or features as desired by their parent or guardian.

Prior art Gatz et al. (US Publication 2002/0049806) teaches:

system and method for account based access control system allowing the holder of one account to control the ability of one or more other account holders to access information in an information network. receiving a request from a parent or guardian of a minor to sign up for an Instant Messaging (IM) service on behalf of the minor; receiving a profile created by parent or guardian; one or more control policies for usage of the IM service; receiving a request from the minor to log on to the IM service using a client device; limiting access to a user using a child account that is associated with a family

account, where such limitations are determined, at least in part, based on selections made by a user of a parent account associated with the family account.

Prior art Gatz et al. (US Publication 2002/0049806) does not teach:

upon receiving a request from a minor to log on to the IM service using a client device, IM system communicating information from the profile associated with the minor to the client device to modify the functionality of the client device by installing a plug-in to comply with at least one policy in the profile.

Prior art Parental Control Software by CSS teaches:

idea of using a policy engine of the client device to limit usage of the IM service to the minor based on the at least one policy

Prior art Parental Control Software by CSS does not teach:

upon receiving a request from a minor to log on to the IM service using a client device, IM system communicating information from the profile associated with the minor to the client device to modify the functionality of the client device by installing a plug-in to comply with at least one policy in the profile.

Prior art Plugin for AOL Instant Messenger teaches:

Idea of using a plug-in for an instant messaging for allowing a user to customize Instant Messaging.

Prior art Plugin for AOL Instant Messenger does not teach:

upon receiving a request from a minor to log on to the IM service using a client device, IM system communicating information from the profile associated with the minor to the client device to modify the functionality of the client device by installing a plug-in to comply with at least one policy in the profile.

Prior art Bell et al. (WO 3058464 A1) teaches:

IM system and method for presenting information to a user and for managing the handling of multiple messages. A priority hierarchy is established and set by a user with respect to each conversant; Message from high priority conversants are delivered and displayed prior to messages from lower priority conversants.

Prior art Bell et al. (WO 3058464 A1) does not teach:

upon receiving a request from a minor to log on to the IM service using a client device, IM system communicating information from the profile associated with the minor to the client device to modify the functionality of the client device by installing a plug-in to comply with at least one policy in the profile.
